

Rick and Morty App

Create a mobile app using the [Rick and Morty API](https://rickandmortyapi.com/).

<https://rickandmortyapi.com/>

Requirements

Functional Requirements

- After launching, the app should display characters, using the `/character` endpoint.
 - For each character show a thumbnail, name and the amount of episodes the character appeared in.
 - Display 20 characters.
- User should be able to search for a character by name.
- Tapping on a character should display a detailed view, with:
 - Photo/Image
 - Name
 - Status
 - Species
 - Gender
 - Current location

Technical Requirements

- Make use of the Rick and Morty REST API.
- Design is not important
- Git should be used and a Github/Bitbucket/etc link should be provided to the completed.
- Should follow Clean code, scalability, architectural pattern.
